Einziehbarer Schirm. Oeffnung und Schliessung oberhalb von Tischen und Stuehlen. Neigung bis zu 60°C.

TELESCOPIC

Ombrelloni a palo centrale con chiusura telescopica.
Central pole parasols with telescopic opening system.
Mittelmastschirme mit teleskopischem Oeffnungssystem.

INTRODUZIONE INTRODUCTION

IT

Scolaro è un'azienda nata 50 anni fa come antico laboratorio artigianale di ombrelloni DOC e trae le sue radici nelle vicinanze di Venezia, luogo intriso di storia e bellezza senza tempo, che ha ispirato generazioni di artisti.

L'ampia gamma di articoli è studiata per il Contract, l'arredo giardino e il settore pubblicitario ed è costituita da ombrelloni in legno e alluminio con palo centrale, palo laterale e con telaio telescopico. La politica aziendale costantemente rivolta alla soddisfazione del cliente finale consente ora a Scolaro di esportare i propri prodotti in più di 70 Paesi. All'esperienza e capacità manipolativa aggiunge negli anni sempre maggiori tecnologie per migliorare lo standard qualitativo e da semplice prodotto per riparare dal sole ne ha fatto un elegante strumento per l'arredamento personalizzato.

Il design, le nuove soluzioni tecniche e l'abbinamento dei materiali migliori, segnano l'evoluzione e l'utilizzo dell'ombrellone, il tutto garantito da un processo produttivo interamente italiano.

I nostri articoli sono progettati, sviluppati e prodotti interamente all'interno della nostra azienda con sede in Italia. Particolare cura per la rifinitura e il controllo di qualità sono parte integrante della nostra politica.

Grazie ai materiali impiegati e ai dispositivi tecnici i nostri articoli sono particolarmente robusti e adatti per un uso intenso e professionale. L'utilizzo di tessuti acrilici impermeabili, di legno, acciaio e alluminio trattati ne garantiscono una lunga vita. L'azienda Scolaro presta particolare attenzione alla facilità di manutenzione e alla disponibilità di componenti di ricambio garantita nel tempo.

EN

Scolaro is a company born 50 years ago as an ancient workshop of DOC umbrellas and draws its roots in the vicinity of Venice, a place steeped in history and timeless beauty, which has inspired generations of artists.

The wide range of items is designed for contract, garden furniture and advertising sector, consists of wooden and aluminum umbrellas with central and side pole and telescopic frame. The company policy constantly aimed at final customer satisfaction allows Scolaro to export its products to more than 70 countries. To the experience and manipulative skills are added over the years more and more technologies to improve the quality standard, making a simple product for sheltering from the sun an elegant tool for personalized furnishing.

Design, new technical solutions and the combination of the best materials mark the evolution and use of the sunshade, all guaranteed by an entirely Italian production process.

Our products are designed, developed and produced entirely in-house by our company based in Italy. Special care for finishing and quality control are an imperative part of our policy.

Thanks to the materials used and the technical devices, our products are particularly robust and suitable for intensive and professional use. The application of waterproof acrylic fabrics, treated wood, steel and aluminum ensure their long life.

Scolaro Company pays special attention to ease of maintenance and the readiness of spare parts guaranteed over time.

50 ANNI DI TRADIZIONE, INNOVAZIONE E CREATIVITÀ MADE IN ITALY: L'ARTE DELL'ECCELLENZA

*50 YEARS OF TRADITION, INNOVATION AND CREATIVITY
MADE IN ITALY: THE ART OF EXCELLENCE*

IT

Dal 1974 i nostri ombrelloni sono affidabili, in linea con le tendenze dell'outdoor e destinati a durare nel tempo, grazie alla sostenibilità dei migliori materiali utilizzati. Da generazioni, l'Italia è sinonimo di eccellenza artigianale, con un patrimonio culturale che abbraccia secoli di tradizione e maestria. Questa eredità si riflette nella nostra azienda, dove rispettiamo e preserviamo il meglio del passato, ma guardiamo costantemente al futuro. Vivere all'aria aperta è un'esigenza sana e sempre più sentita, in ogni luogo. Offrire comfort e sicurezza con ombrelloni dallo stile raffinato è il nostro lavoro da 50 anni.

Investiamo in tecnologie all'avanguardia per migliorare la qualità dei nostri prodotti e rendere il nostro processo di produzione, interamente 100% Made in Italy, sempre più efficiente.

La ricerca e lo sviluppo sono i pilastri su cui costruiamo il nostro futuro, consentendoci di offrire ai nostri clienti soluzioni all'avanguardia che soddisfano le esigenze del mondo moderno. Le competenze manifatturiere e il know-how, la passione per la bellezza e l'attenzione ai dettagli si uniscono per creare prodotti unici, che rappresentano il meglio dello stile Italiano.

Questo rende Scolaro un'azienda leader che si impone in mercati anche molto diversi tra loro, ma uguali nello scegliere la qualità migliore. I nostri primi cinquant'anni ci hanno dato la soddisfazione di una crescita continua.

La stabilità e la solidità economica si abbina alla forza di un brand di alto livello, sempre più conosciuto e riconoscibile, capace di distribuire i propri prodotti nelle location più prestigiose ed esclusive al mondo.

50

1974 - 2024

EN

Since 1974 our umbrellas are reliable, in line with the trends of the outdoor and intended to last over time, thanks to the sustainability of the quality of the materials used.

For generations, Italy has been synonymous of artisanal excellence, with a cultural heritage spanning centuries of tradition and craftsmanship. This legacy is reflected in our company, where we respect and preserve the best of the past, but constantly looking to the future. Living in the open air is a healthy and highly demanded, in every place. Offering comfort and safety with refined style umbrellas has been our job for 50 years.

We invest in cutting-edge technologies to improve the quality of our products and make our production process, 100% Made in Italy, increasingly efficient. Research and development are the pillars on which we build our future, enabling us to offer our customers state of the art solutions that meet the needs of the modern world. Manufacturing skills and know-how, passion for beauty and attention to detail come together to create unique products that represent the best of Italian style.

This makes Scolaro a leading company that stands out in markets that are also very different from each other but equivalent in choosing the best quality. Our first fifty years have given us the satisfaction of continuous growth.

The stability and economic solidity is combined with the strength of a high level brand, increasingly known and recognizable, able to distribute its products in the most prestigious and exclusive locations in the world.

EN

Our products are designed, developed and manufactured entirely inside our company based in Italy. Special care for finishing and quality control are an integral part of our policy. Thanks to the materials used and the technical equipment, our items are strong and suitable for heavy and professional employ. The use of waterproof acrylic fabrics, treated wood, steel and aluminium grant a long life. Particular attention for an easy maintenance and the availability of spare parts is guaranteed over time.

IT

I nostri articoli sono progettati, sviluppati e prodotti interamente all'interno della nostra azienda con sede in Italia. Particolare cura per la rifinitura e il controllo di qualità sono parte integrante della nostra politica. Grazie ai materiali impiegati e ai dispositivi tecnici i nostri articoli sono particolarmente robusti e adatti per un uso intenso e professionale. L'utilizzo di tessuti acrilici impermeabili, di legno, acciaio e alluminio trattati ne garantiscono una lunga vita. La ditta Scolaro presta particolare attenzione alla facilità di manutenzione e alla disponibilità di componenti di ricambio garantita nel tempo.

POLITICA AMBIENTALE *ENVIRONMENTAL POLICY*

Consideriamo fondamentale che le nostre attività siano svolte nel rispetto dell'ambiente, riducendo il più possibile i propri impatti e le fonti di inquinamento, gestendo in modo ottimale le risorse e promuovendo la riduzione e il corretto smaltimento dei rifiuti.

La nostra politica ambientale si ispira ai seguenti principi:

- La riduzione dell'impatto ambientale e il miglioramento delle prestazioni ambientali e degli standard di sicurezza negli ambienti di lavoro rientrano tra i criteri che concorrono alla definizione delle strategie aziendali.
- La consapevolezza di ciascuno (proprietà, dipendenti, collaboratori, fornitori) in merito alle implicazioni ambientali e di sicurezza delle proprie attività costituiscono elemento indispensabile per il miglioramento delle prestazioni di tutta l'azienda.

We consider it fundamental that our activities are carried out with respect for the environment, reducing as much as possible their impacts and sources of pollution, optimally managing resources and promoting the reduction and proper disposal of waste.

Our environmental policy is inspired by the following principles:

- Reducing environmental impact and improving environmental performance and safety standards in the workplace are among the criteria that contribute to the definition of corporate strategies.
- The awareness of each (property, employees, collaborators, suppliers) regarding the environmental and safety implications of their activities are indispensable elements for improving the performance of the entire company.

VELA TITANIUM **NEW**

L'ombrellone Vela ridefinisce il concetto e l'architettura dell'ombra, inedito e fuori dagli schemi. Il design della copertura si evolve lasciandosi ispirare dal mare e sagomare dal vento, ottenendo linee sinuose ed ergonomiche. Dalla fusione armonica tra un ombrellone e una vela nasce una sinergia tra resistenza dei materiali e leggerezza delle forme. Un oggetto unico per valorizzare il Vostro ambiente esterno.

EN

The parasol Vela redefines the concept and architecture of the shadow, unusual and unconventional. The cover design evolves taking inspiration from the sea and is shaped by the wind, resulting in sinuous and ergonomic lines. From the harmonic fusion between a parasol and a sail, a synergy between material strength and lightness of form, takes shape. A unique item to enhance your outdoor environment.

*DE*

Der Sonnenschirm Vela definiert den Begriff und die Architektur des Schattens, ungewöhnlich und unkonventionell. Das Design der Bespannung lässt sich vom Meer inspirieren und durch den Wind modeln. Ergebnis sind ergonomische und gewundene Linien. Die Kombination aus Schirm und Segel ergibt eine Synergie zwischen Kraft und Leichtigkeit. Ein einzigartiger Schirm der die Aussenausstattung aufwertet.

FR

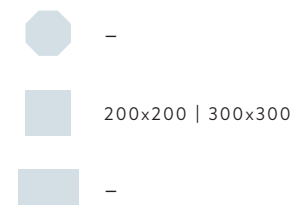

Le parasol Vela redéfinit le concept et l'architecture de l'ombre, insolite et non conventionnelle. La conception de la couverture évolue en s'inspirant de la mer et façonné par le vent, ce qui entraîne des lignes sinueuses et ergonomique. De la fusion harmonieuse entre un parasol et une voile né une synergie entre la résistance des matériaux et la légèreté de la forme. Un article unique pour améliorer votre environnement extérieur.

ES

El Parasol Vela redefine el concepto y la arquitectura de la sombra, nuevo y poco convencional. El diseño del tejido evoluciona inspirándose en el mar y las formas que toma el viento, consiguiendo líneas sinuosas y ergonómicas. De la unión armónica entre un parasol y una vela, nace una sinergia entre la resistencia de los materiales y la ligereza de las formas, un objeto único para mejorar su ambiente al aire libre.

NL

De parasol Vela geeft het begrip schaduw anders weer, ongewoon en onconventioneel. De vormgever van het doek liet zich inspireren door de zee en de wind. Het resultaat is ergonomisch met strakke lijnen. Door de harmonieuze samenvoeging van een parasol en een zeil ontstaat een synergie tussen stabiliteit van materialen en luchtigheid van de vormgeving. Een unieke parasol, die een grote bijdrage levert aan de uitstraling van ieder terras.

VERIFICA LA STABILITÀ - p.196

Check stability - Vérifiez la stabilité - Stabilität prüfen - Compruebe la estabilidad - Controleer de stabiliteit

LIDO DARK ^{NEW}

Ombrellone elegante e funzionale con sistema “push-up” che permette l’apertura con una semplice spinta, senza la necessità di fare sforzi e fare leva su una manovella o utilizzare una corda e carrucola: questo ne rende l’utilizzo pratico ed intuitivo. Progettato per essere estremamente funzionale, elegante e facile da utilizzare. Struttura leggera ma robusta realizzata in materiali di alta qualità che contribuiscono a una sensazione di modernità e sofisticatezza. Adatto ad un utilizzo nel settore balneare, piscine, balconi e terrazze.

EN

Elegant and functional umbrella with “push-up” system that allows it to be opened with a simple push, without the need to use a crank or a rope: this makes its use practical and intuitive. Designed to be extremely functional, stylish and easy to use. Lightweight but with a sturdy structure made of high-quality materials that contribute to a modern and sophisticated feel. Suitable for use in seaside area, swimming pools, balconies and terraces.

DE

Eleganter und funktioneller Schirm mit „Push-up“-System, das das Öffnen mit einem einfachen Druck ermöglicht, ohne dass eine Kurbel oder ein Seil erforderlich sind. Dies macht die Verwendung praktisch und intuitiv. Konzipiert um äußerst funktional, trendy und einfach zu bedienen zu sein. Leichtes und dennoch starkes Gestell aus hochwertigen Materialien, modern und anspruchsvoll. Geeignet für Küstengebiete, Schwimmbäder, Balkone und Terrassen.

FR

Parasol élégant et fonctionnel avec système “push-up” qui permet de l’ouvrir d’une simple pression, sans avoir besoin de tourner une manivelle ou d’utiliser une corde ou une poulie: cela rend son utilisation pratique et intuitive. Conçu pour être extrêmement fonctionnel, élégant et facile à utiliser. Construction légère mais robuste faite de matériaux de haute qualité qui contribuent à une sensation de modernité et de sophistication. Convient pour une utilisation dans le secteur balnéaire, les piscines, les balcons et les terrasses.

ES

Parasol elegante y funcional con sistema “push-up” que permite abrir con un simple empujón, sin necesidad de girar un mango ni utilizar cuerda o polea: esto hace que su uso sea práctico e intuitivo. Diseñado para ser extremadamente funcional, elegante y fácil de usar. Construcción ligera pero resistente, fabricada con materiales de alta calidad que contribuyen a una sensación de modernidad y sofisticación. Apto para uso en el sector costero, piscinas, balcones y terrazas.

NL

Een elegante en functionele parasol met een ‘push-up’-systeem waardoor hij met een simpele druk kan worden geopend, zonder dat je een hendel hoeft te draaien of een touw en katrol hoeft te gebruiken: dit maakt hem praktisch en intuïtief in gebruik. Ontworpen om uiterst functioneel, elegant en gebruiksvriendelijk te zijn. Lichtgewicht maar wel robuuste constructie van hoogwaardige materialen die bijdragen aan een moderne en verfijnde uitstraling. Geschikt voor gebruik aan de kust, bij zwembaden, op balkons en terrassen.

VERIFICA LA STABILITÀ - p.196

Check stability - Vérifiez la stabilité - Stabilität prüfen - Compruebe la estabilidad - Controleer de stabiliteit

PALLADIO BRACCIO

Modello di ombrellone prodotto da Scolaro da oltre 30 anni opportunamente aggiornato nel tempo. Dimostra l'ottima progettazione iniziale e riassume la tradizione ed esperienza nel settore, confermato anche dalle migliaia di unità vendute in tutto il mondo. Sostegno verticale previsto in alluminio con speciale finitura effetto legno ancora più robusto e duraturo.

EN

Model produced by Scolaro since over 30 years opportunely renewed. Thousand of pieces sold worldwide, of which many are still employed, are the proof of an optimal planning and that this item sums up tradition and experience in the branch. Vertical aluminium support provided with special wood finishing for an unalterable design.

DE

Scolaro stellt dieses Model seit ueber 30 Jahren her und hat es mit der Zeit stets erneuert und verbessert. Die tausenden Teile, die weltweit verkauft wurden und stets noch eingesetzt werden sind der Beweis einer optimalen Planung und der erfolgreichen Kombination von Tradition und Erfahrung in der Branche. Alumast mit spezieller Holzoptik. Unveraenderliches Design.

FR

Modèle de parasol fabriqué par Scolaro depuis plus de 30 ans et relooké. Les milliers de pièces vendus dans le monde sont la preuve de la qualité, robustesse et succès que connaît le modèle Palladio et du professionnalisme de la ste Scolaro. Mat vertical en aluminium avec finition effet bois permettant un design inchangé.

ES

Modelo fabricado por Scolaro desde hace 30 años, oportunamente renovado. Se vendieron miles de piezas (sombrellas) por todo el mundo, de las cuales muchas aún son utilizadas, y esto es la prueba de que este artículo resume la tradición y la experiencia en el sector. Soporte vertical fabricado en aluminio con acabados especiales imitación madera, lo hacen más robusto y duradero.

NL

Dit model wordt door Scolaro al meer dan 30 jaar op de markt gebracht en is gedurende die tijd steeds aan de actualiteit aangepast. De vele duizenden die er in de afgelopen jaren wereldwijd verkocht zijn, leveren het bewijs voor uitstekende kwaliteit; dit dankzij de succesvolle combinatie van vakmanschap en ervaring. Aluminium mast met unieke essenhout uitstraling. Solide zwevende designparasol. Met nieuwe aluminium mast met uniek Iroko houten uitstraling.

VERIFICA LA STABILITÀ - p.196

Check stability - Vérifiez la stabilité - Stabilität prüfen - Compruebe la estabilidad - Controleer de stabiliteit

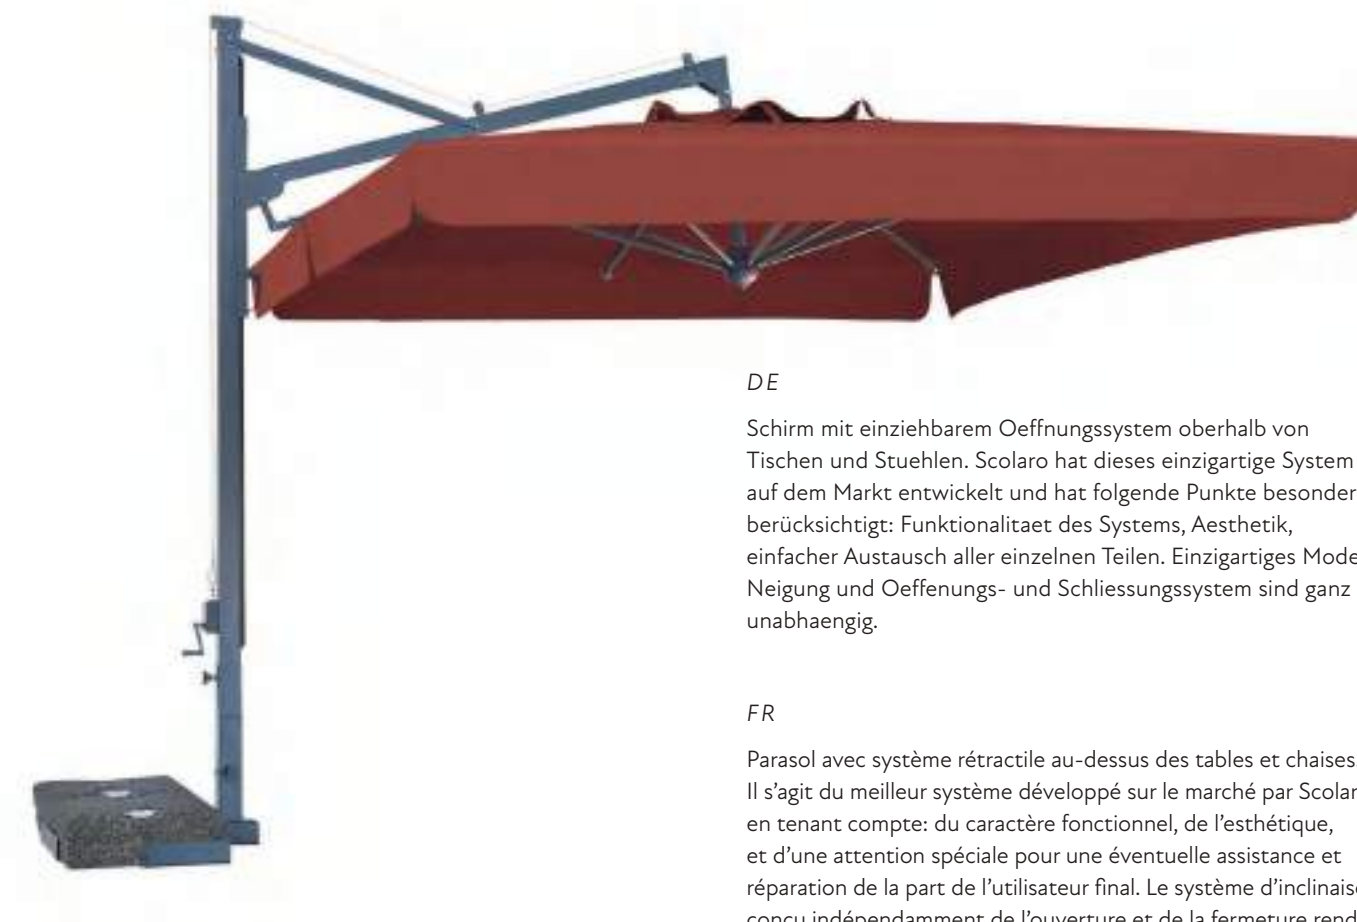

GALILEO DARK

Ombrellone con sistema di apertura retrattile permette la facile chiusura dell'ombrellone anche in presenza di arredo. Si tratta del migliore sistema presente nel mercato perché Scolaro, nel progettare e sviluppare ha tenuto conto di: apertura e inclinazione facilitata, estetica, molta attenzione nel prevedere eventuale assistenza o facile riparazione anche ad opera dell'utente finale. Il sistema di inclinazione progettato indipendentemente dall'apertura e chiusura rende questo modello la migliore soluzione presente nel mercato.

EN

Parasol with opening system close on the support that allows an easy closing of the parasol without moving the furniture. It's the best system on the market that Scolaro has developed considering: functionality of the system, aesthetics, special attention in foreseeing a possible assistance or easy restore by the final customer. The inclination system is planned independently from the opening and closing and makes therefore this model the best solution in the market.

DE

Schirm mit einziehbarem Öffnungssystem oberhalb von Tischen und Stuehlen. Scolaro hat dieses einzigartige System auf dem Markt entwickelt und hat folgende Punkte besonders berücksichtigt: Funktionalitaet des Systems, Aesthetik, einfacher Austausch aller einzelnen Teile. Einzigartiges Model. Neigung und Öffnungs- und Schliessungssystem sind ganz unabhængig.

FR

Parasol avec système rétractile au-dessus des tables et chaises. Il s'agit du meilleur système développé sur le marché par Scolaro en tenant compte: du caractère fonctionnel, de l'esthétique, et d'une attention spéciale pour une éventuelle assistance et réparation de la part de l'utilisateur final. Le système d'inclinaison conçu indépendamment de l'ouverture et de la fermeture rend ce modèle la meilleure solution sur le marché.

ES

Parasole con sistema de apertura retráctil, permite el cierre fácil de la sombrilla, sin mover el mueble. Este es el mejor sistema del mercado que Scolaro ha desarrollado teniendo en cuenta: Funcionalidad del sistema, Estética, Atención especial al prever una posible asistencia o fácil reparación por el cliente final. El sistema de inclinación diseñado independientemente del de apertura y cierre, hace que éste modelo sea la mejor solución presente en el mercado.

NL

Nieuw systeem voor het openen en sluiten van de zwevende parasol, zonder uw tuinmeubilair daarvoor te moeten verplaatsen. De parasol hoeft nu niet meer verwijderd te worden als u deze niet gebruikt, maar wordt bevestigd aan de mast. Dus geen storende parasol en parasolarm meer boven uw tuinmeubilair als de parasol niet als zodanig gebruikt wordt. Dit unieke systeem is door Scolaro ontwikkeld, waarbij extra aandacht besteed is aan belangrijke punten zoals: Functionaliteit, Vormgeving, Aan het mogelijk vervangen van onderdelen door de consument is extra aandacht besteed. Enige in zijn soort op de parasolmarkt dankzij het onafhankelijke open- en sluitsysteem.

GALILEO STARWHITE

Il modello Galileo Retrattile, già molto apprezzato per gli accorgimenti tecnici e per la praticità di utilizzo, è disponibile anche con il telaio verniciato a polveri in colore Starwhite opaco. Questa variante rende il Galileo Starwhite ancora più elegante e sofisticato.

EN

The model Galileo Retractable, much appreciated for the technical and practical use, is also available with the frame powder coated in Starwhite matt. This variant makes the Galileo Starwhite even more elegant and sophisticated.

DE

Das einziehbare Modell Galileo, bisher insbesondere fuer den technischen und praktischen Einsatz geschätzt, ist auch mit pulverbeschichtetem Gestell in Farbe weiß Starwhite matt erhältlich. Diese Variante macht Galileo Starwhite noch eleganter und raffi nierter.

FR

Le modèle rétractable Galileo, très apprécié pour l'utilisation technique et pratique, est disponible aussi avec l'armature vernis en couleur Starwhite. Cette variante rend le Galileo Starwhite encore plus élégant et sophistiqué.

ES

El modelo galileo retrattile, es muy apreciado por los datos tecnicos y por ser muy practico en su uso, y tambien esta disponible con la estructura recubierta con pintura en polvo en color blanco. Esta variante hace al Galileo Starwhite aun mas elegante y sofi sticado.

NL

Het model Galileo Retrattile, befaamd vanwege het technische en praktische gebruikgemak, is ook verkrijgbaar in Starwhite geëpoxeerde uitvoering. De uitvoering Galileo Starwhite is daardoor nog eleganter en chiquer.

-

300x300 | 350x350

300x400

GALILEO WOOD

Il modello Galileo Retrattile, già molto apprezzato per gli accorgimenti tecnici e per la praticità di utilizzo, si rinnova con l'introduzione della finitura effetto legno, completando la proposta per un pubblico raffinato ed attento alle tendenze del momento.

EN

The retractable Galileo, already highly appreciated for its technical features and practicality of use, is renewed with the introduction of the wood-effect finish, completing the offer for a refined and trend-conscious public.

DE

Das einziehbare Model Galileo ist dank seiner technischen Eigenschaften und praktischer Handhabung sehr geschätzt. Diese Serie wird nun mit der Einfuehrung der Holzoptik erneuert und vervollstaendigt das Angebot fuer ein anspruchsvolles und trendbewusstes Publikum

FR

Le modèle Galileo Rétractable, déjà très apprécié pour ses caractéristiques techniques et sa praticité d'utilisation, se renouvelle avec l'introduction de la finition effet bois, complétant la proposition destinée à un public raffiné et attentif aux tendances actuelles.

ES

El modelo retráctil Galileo, ya muy apreciado por sus características técnicas y practicidad de uso, se renueva con la introducción del acabado efecto madera, completando la propuesta para un público refinado y atento a las tendencias del momento.

NL

Het model Galileo Retractable, dat al zeer gewaardeerd werd om zijn technische kenmerken en gebruiksgemak, is vernieuwd met de introductie van de hout-look, wat het model verfijnd en trendy maakt. Retractable parasols sluiten tegen de mast, dus zijn zeer compact als ze gesloten zijn.

BTAZS	Ø 160 mm	350 mm	5 kg
--------------	----------	--------	------

La base e l'eventuale zavorra sono fondamentali per garantire stabilità e sicurezza. Selezionare l'opzione adeguata al momento dell'ordine. In caso di fissaggio a terra si esclude il rischio di ribaltamento dell'ombrellone, ma non il cedimento strutturale di alcuni componenti se sottoposti a condizioni atmosferiche incompatibili con l'uso dei ns prodotti. Queste tabelle sono indicative e prevedono che il pavimento o il terreno di appoggio sia perfettamente piano e regolare. Gli ombrelloni e i rispettivi componenti delle basi devono essere assemblati correttamente rispettando le istruzioni di montaggio. La stabilità degli ombrelloni può variare nel caso di condizioni atmosferiche particolari. L'utilizzatore finale è responsabile del corretto uso dell'ombrellone. Nessuna rivalsa può essere fatta sul produttore.

EN

The base and any ballast are essential to ensure stability and safety. Please select the appropriate option when ordering. In case of ground fixation, the risk of overturning of the parasol is excluded, but not the structural failure of some components, if subjected to atmospheric conditions that are incompatible with the use of our products. This schedule considers statics calculation and foresees that the floor where the parasol has to be positioned is perfectly flat and regular. The parasols and components have to be assembled correctly and respecting the assembly instruction. The schedule has to be considered indicative because many variables that depend from the area of employ and position of the parasols are not foreseeable. No rights can be derived from this. The use of a parasol is always on your own responsibility.

DE

Der Staender und eventueller Ballast sind grundlegend um Stabilitaet und Sicherheit zu gewaehrleisten. Bitte waehlen Sie bei der Bestellung die entsprechende Option aus.

Bei Bodenbefestigung ist das Risiko des Umkippens des Schirms ausgeschlossen, aber nicht das strukturelle Versagen einiger Bestandteile, wenn es atmosphärischen Bedingungen ausgesetzt wird, die mit der Verwendung unserer Produkte nicht vereinbar sind. Diese Aufstellung beinhaltet statistische Kalkulationen und sieht vor, dass der Schirm auf einem ebenen und regelmaessigen Boden positioniert wird. Der Schirm und die Bestandteile des Staenders muessen gemaess Anbauanleitungen montiert werden. Die Stabilitaet der Schirme kann auf Grund besonderer klimatischen Konditionen aendern. Der Endbenutzer ist fuer die ordnungsgemaesse Verwendung des Schirmes verantwortlich.

FR

La base et les eventuels poids sont essentiels pour assurer la stabilité et la sécurité. Svpl. sélectionnez l'option appropriée lors de la commande. En cas de fixation au sol, le risque de renversement du parasol est exclu, mais pas la défaillance structurelle de certains composants s'ils sont soumis à des conditions atmosphériques incompatibles avec l'utilisation de nos produits. Ces tableaux sont à titre indicatif et ils prévoient que la surface sur laquelle est implanté le parasol soit parfaitement plane et lisse. Les parasols et les éléments respectifs des bases doivent être assemblés en respectant scrupuleusement les instructions de montage. La stabilité des parasols peut varier dans le cas de conditions atmosphériques particulières et dépend du lieu et de l'utilisation propre à chaque utilisateur (le parasol doit être fermé en cas de vent fort et/ou de mauvaises conditions météorologiques).

ES

La base y posible balasto son fundamentales para garantizar la estabilidad y la seguridad. Seleccione la opción adecuada al realizar el pedido. En caso de fijación al suelo, se excluye el riesgo de vuelco del parasol, pero no el fallo estructural de algunos componentes si se someten a condiciones atmosféricas incompatibles con el uso de nuestros productos. Estos cuadros son indicativos y requieren que el suelo o el apoyo de tierra sea perfectamente plano y liso. El parasol y los respectivos componentes de la base deben ser montados correctamente respetando las instrucciones. La estabilidad de los parasoles puede variar según las condiciones atmosféricas.

NL

Basis en eventuele ballast zijn essentieel om stabiliteit en veiligheid te garanderen. Selecteer alstublieft de juiste optie bij het bestellen. In het geval van bevestiging aan de grond is het risico dat de parasol omvalt uitgesloten, maar niet het structurele falen van sommige onderdelen als ze worden blootgesteld aan atmosferische omstandigheden die onverenigbaar zijn met het gebruik van onze producten. Dit schema houdt rekening met statische berekeningen en gaat ervan uit dat de vloer waarop de parasol moet worden geplaatst perfect vlak en regelmatig is. De parasols en onderdelen moeten correct en volgens de montagehandleiding worden gemonteerd. Het schema moet als indicatief worden beschouwd omdat veel variabelen die afhangen van het werkgebied en de positie van de parasols niet te voorzien zijn.

STABILITY

1

- Maximum stability with ground fixation
- Maximale Stabilität bei Bodenbefestigung
- Stabilité maximale avec fixation au sol
- Máxima estabilidad con fijación al suelo
- Maximale stabiliteit door bodembevestiging

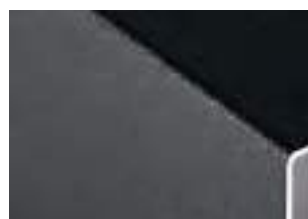

- In caso di base con ruote, prestare particolare attenzione in caso di vento. Prima di spostare l'ombrellone è necessario chiuderlo.
- In case of base with wheels, be especially careful in windy conditions. Close the parasol before moving it.
- Bei Staender mit Räder und Wind besonders vorsichtig sein. Der Schirm kann geschlossen bewegt werden.
- Dans le cas d'une base à roues, faites particulièrement attention par temps venteux. Avant de déplacer le parasol, il est nécessaire de le fermer.
- En el caso de una base con ruedas, tenga especial cuidado en condiciones de viento. Antes de mover la sombrilla es necesario cerrarlo.
- Wees vooral voorzichtig met statieven met wielen en wind. De parasol kan in gesloten toestand worden verplaatst.

Kit completo di luci a led ad alta luminosità sviluppato per le esigenze del settore professionale. Si può applicare a tutti gli ombrelloni a braccio laterale e Capri di nostra produzione anche successivamente alla consegna; non è quindi necessaria una predisposizione all'origine.

Il kit è composto da:

- 4 profili tubolari a Led orientabili IP65 in PMMA satinato, per utilizzo esterno, da applicare alle stecche dell'ombrellone;
- profili a Led disponibili con due diverse lunghezze: 50 cm per gli ombrelloni a braccio e 120 cm per il modello Capri;
- luce a Led bianco 3000K;
- batteria ricaricabile con autonomia minima di 8 ore, completa di contenitore IP56 e carica batteria;
- oppure alimentatore elettronico stabilizzato 220Vac - 12Vdc 60W;
- telecomando IR;
- cablaggio completo per utilizzo in esterno;
- Nuovo sistema di fissaggio semplificato con calamita.

EN

Complete high light LED kit developed for the professional and commercial fit. Usable on all our cantilever parasols and model Capri, even after the supply. It is therefore not necessary to foresee the predisposition from the beginning.

The Led Kit is composed by

- 4 tubular profiles with orientable IP65 in PMMA satin finish, for external use, to be applied on the parasol ribs;
- led profiles available with two different lengths: 50 cm for cantilever parasols and 120 cm for Capri model;
- white Led Light 3000K;
- rechargeable battery with a minimum battery life of 8 hours, including IP56 box and battery charger;
- or stabilized electronic power supply 220Vac - 12Vdc 60W;
- IR remote control;
- complete wiring for outdoor use;
- New simplified fixing system with magnet.

Per ombrelloni a braccio. Barre led da 50 cm
For cantilever parasols. Led strips 50 cm

Per ombrelloni Capri. Barre led da 120 cm
For Capri parasol. Led strips 120 cm

USO E MANUTENZIONE

INDICAZIONI

- Prima dell'uso, conservare e leggere attentamente i manuali e le istruzioni di montaggio che si trovano all'interno della confezione.
- La base deve essere zavorrata. Un peso insufficiente compromette seriamente la stabilità dell'ombrellone.
- Rimuovere sempre la manovella quando non in uso e tenerla fuori dalla portata dei bambini.
- Per evitare danni o lesioni personali, l'ombrellone deve essere chiuso e in alcune condizioni atmosferiche avverse potrebbe essere necessario rimuovere il prodotto e stoccarlo in luogo protetto. Ricorda sempre che l'ombrellone non è una costruzione fissa. La ditta Scolaro non può essere ritenuta responsabile per danni alla merce fornita, o lesioni derivanti da un uso improprio e dal mancato rispetto delle istruzioni e delle linee guida fornite.

IMPIEGO DEL PRODOTTO

Prima di iniziare ad aprire l'ombrellone, assicurarsi che il tessuto non sia rimasto impigliato nelle stecche interne. Per aprire o chiudere l'ombrellone ruotare la maniglia (dove presente) nel senso indicato dalle frecce e dalla scritta "Apri" o "Chiudi". Un funzionamento errato potrebbe strappare la corda o danneggiare il meccanismo. Non forzare mai le corde o maniglie. Se si bloccano, controlla perché è successo ed elimina la possibile causa.

Parti in legno: applicare un impregnante per legno a base di cera almeno una volta all'anno prima della stagione invernale. Chiudere l'ombrellone quando le condizioni meteorologicxhe non sono adatte, ad es. forte vento o pioggia battente.

Gli ombrelloni Scolaro possono essere abbinati a basi speciali sviluppate per il fissaggio a terra. Qualora si decida di posizionare un ombrellone Scolaro utilizzando solo zavorra, ne viene certificata l'idoneità all'utilizzo in condizioni di vento moderato. Nella tabella specifica sono indicate le zavorre minime. Il Cliente è l'unico responsabile dell'installazione e della gestione dell'ombrellone.

ACCIAIO INOSSIDABILE

Attenzione:

1. NON UTILIZZARE I SEGUENTI PRODOTTI su parti in acciaio inossidabile: Candeggina a base di cloro o detersivi contenenti candeggina (possono corrodere l'acciaio inossidabile). Acido cloridrico o prodotti contenenti cloruri (possono corrodere l'acciaio inossidabile).
2. Il sale, il calcare o gli acidi (bevande e alimenti) possono scolorire le parti in acciaio inossidabile se non pulite tempestivamente.
3. I prodotti o le parti in acciaio inossidabile utilizzati in prossimità del mare o per la decorazione interna delle piscine richiedono una pulizia più frequente per rimuovere i cloriti depositati e per prevenire la corrosione e il deterioramento chimico delle superfici esterne.
4. Macchie o ruggine rilevate sulle superfici in acciaio inossidabile devono essere pulite tempestivamente.
5. Le macchie non rimosse per lunghi periodi possono diventare permanenti.
6. La ruggine può causare reazioni chimiche o corrodere l'acciaio inossidabile.

Per rimuovere macchie o ruggine:

- Applicare un detersivo o lucidante specifico non abrasivo per acciaio inox.
- Sciacquare accuratamente con acqua pulita.
- Infine asciugare bene per evitare che si formino striature, sfregamento nel senso delle fibre.

METALLI VERNICIATI: FERRO E ALLUMINIO

Per una lunga durata dell'ombrellone si consiglia di riporlo in ambienti asciutti, durante il periodo invernale e quando non utilizzato. Si consiglia inoltre di controllare una volta a stagione, soprattutto dopo un lungo periodo di inattività, il corretto funzionamento di tutti i componenti. La nostra garanzia non copre alcun tipo di graffio o abrasione alla finitura causata dal contatto con altri arredi o dalla conseguente corrosione.

L'impiego in ambienti marini può portare all'accumulo di sali e cloruri sulla verniciatura a polvere. La mancata esecuzione di una regolare pulizia con acqua dolce può causare la formazione di bolle, ossidazioni, scolorimento e invalidare la garanzia.

Per la pulizia delle superfici in metallo verniciato utilizzare acqua fredda e detersivi liquidi non abrasivi o aggressivi.

Applicare con un panno morbido. Nel caso di superfici molto sporche e/o invecchiate, dopo la pulizia, si consiglia di trattarle con paraffina liquida. In caso di macchie causate da depositi di calcare su vernici di struttura grossolana (es. ferro antico e marrone d'india) pulirle con uno straccio e una soluzione di aceto di vino bianco diluito in acqua fredda.

LEGNO: IROKO

Legno tradizionale impiegato per l'arredo esterno e l'industria nautica. L'Iroko è un legno duro ad alto contenuto di olio, adatto per uso esterno. Estremamente duraturo. È praticamente inalterabile alla ripetuta esposizione agli agenti atmosferici. Anche se trattato, la superficie assume una patina grigio argento che è la naturale protezione dall'interno del legno, considerato parte essenziale del fascino dell'Iroko. La naturale tendenza del legno ad ingrigire o perdere la brillantezza della vernice può essere prevenuta nelle prime fasi di vita del prodotto. L'ombrellone può essere ripristinato mediante un nuovo trattamento con adeguato prodotti facilmente reperibili nei negozi specializzati. È necessario applicare una soluzione di acqua e olio incolore, a superfici esposte con un panno. L'olio deve essere molto diluito. Le macchie superficiali possono essere rimosse intervenendo per tempo, prima che il legno possa assorbirle completamente. Carteggiare delicatamente la superficie in questione e poi lucidare con un panno ruvido.

TESSUTI SINTETICI: ACRILICO E POLIESTERE

Il tessuto è impermeabile e trattato antimuffa per respingere l'acqua, le macchie e garantire la traspirazione. Si prega di seguire le nostre istruzioni di manutenzione per garantire la lunga durata del tessuto:

- Rimuovere spesso depositi di polvere, macchie e qualsiasi tipo di sporco per evitare tracce dopo la pulizia.
- È molto importante chiudere l'ombrellone solo quando è perfettamente asciutto. Durante l'inverno e quando l'ombrellone non viene utilizzato, deve essere conservato in un ambiente asciutto. Evitare il contatto prolungato con sostanze oleose e/o coloranti che potrebbero essere assorbite dal materiale di rivestimento in PVC e causare macchie permanenti, oltre a danneggiare la struttura del filo. Non utilizzare solventi o detersivi a base di solventi (evitare l'acetone). Usare acqua e detersivi liquidi non abrasivi, incolori, a PH neutro. Lasciare agire il detersivo per qualche minuto. Risciacquare bene con acqua non più calda di 30°C.

COMPONENTI

I componenti in acciaio, la viteria e gli accessori sono trattati antiruggine. Comunque per una lunga durata dell'ombrellone, durante l'inverno e quando non viene utilizzato, l'ombrellone deve essere conservato in ambiente asciutto. Durante ogni stagione è necessario verificare la funzionalità di tutti i componenti, soprattutto dopo un lungo periodo di inattività. La ditta Scolaro è a vostra disposizione per assistenza tecnica.

GARANZIA

Gli ombrelloni Scolaro sono progettati per durare molti anni esposti all'uso esterno.

Come per molti articoli, l'attenzione nell'uso e nella manutenzione e il rispetto delle istruzioni contenute in queste pagine, permette una vita media ancora più lunga del prodotto e la possibilità di godere di un prodotto ancora più efficiente ed esteticamente gradevole.

I prodotti Scolaro sono garantiti 2 anni.

Se si rispettano le indicazioni e i consigli, la garanzia può essere estesa come segue:

LA GARANZIA COPRE SOLO I DIFETTI DI FABBRICAZIONE DI INTEGRITÀ STRUTTURALE. LA GARANZIA NON COPRE DANNI CAUSATI DA AZIONI MECCANICHE, FORZA NATURALE E ATTI DOLOSI.

5 anni di garanzia sui componenti in alluminio e acciaio inox. Inclusa verniciatura e viti.

- Difetti strutturali non derivanti da uso improprio o mancata manutenzione.
- Corrosione invasiva non prodotta da graffi o abrasioni da utilizzo non asportabile mediante normale pulizia e manutenzione.

5 anni di garanzia sui colori e sul trattamento dei tessuti (resistenza).

- La sostituzione della coperta durante il periodo di garanzia è prevista solo in caso di scolorimento prima della fine del periodo di garanzia. Gli utenti devono conservare correttamente i tessuti, affinché la garanzia sia effettiva. Una corretta manutenzione implica una pulizia regolare.
- La garanzia non copre i danni da contatto con oggetti estranei, abrasioni causate dal vento, uso improprio o abuso (strappi, bruciature e fori). L'uso intensivo in ambiente aggressivo (mare e piscina), richiede un regolare risciacquo del tessuto con acqua dolce per prevenire ed evitare l'accumulo di residui salini e clorurati.

2 anni di garanzia su tutti gli elementi metallici e in acciaio in genere

1 anno di garanzia sui meccanismi di apertura con manovella, previo uso corretto e rispettoso delle istruzioni fornite.

2 anni di garanzia in genere per le finiture e altri materiali non specificatamente menzionati e scritti sopra, comprese le basi in cemento e le zavorre

1 anno di garanzia sui kit luci LED e sui componenti elettrici in general.

LA GARANZIA NON SI APPLICA:

- Se il prodotto non è stato assemblato secondo le istruzioni fornite;
- in caso di uso improprio del prodotto o non conforme alla normale destinazione d'uso del bene;
- in caso di mancato rispetto delle istruzioni per l'uso e la manutenzione indicate nel materiale informativo fornito con il prodotto;
- in caso di stoccaggio in condizioni ambientali non idonee al prodotto;
- in caso di modifica o manomissione del prodotto;
- se il prodotto è stato assemblato o combinato con componenti e prodotti non forniti da Scolaro.

Per usufruire della garanzia è necessario esibire l'articolo difettoso o inviare le foto, unitamente alla fattura o scontrino fiscale.

La garanzia comprende la fornitura di parti di ricambio o la sostituzione del prodotto se necessario. La garanzia non comprende la riparazione in loco o il rimborso delle spese sostenute per il mancato utilizzo del prodotto.

In caso di vizio accertato da Scolaro, si riserva il diritto - a propria discrezione - di sostituire il prodotto con uno uguale o equivalente per caratteristiche essenziali o di rimborsare al cliente solo l'importo pagato per il prodotto. Nessuna ulteriore spesa o danno potranno essere richiesti a Scolaro.

Scolaro non sarà responsabile per eventuali danni a cose o persone derivanti da un uso improprio del prodotto.

Politica di servizio e riparazioni

Anche in caso di danneggiamenti e rotture, Scolaro ha sempre adottato un'attenta e puntuale politica di assistenza post vendita.

In qualunque caso di danneggiamento o necessità, consigliamo di contattare la nostra azienda per valutare la possibilità di riparare e recuperare il prodotto, nonché per ottenere assistenza per eseguire l'intervento.

La corrispondenza ad alti standard qualitativi e funzionali dei materiali impiegati costituisce la garanzia principale della robustezza e resistenza nel tempo dei prodotti Scolaro. Un comportamento rispettoso di norme di manutenzione ed uso, come specificato di seguito, assicura una durata ancora maggiore.

Le informazioni contenute in questo catalogo o in altri stampati pubblicitari della ditta Scolaro, quali caratteristiche tecniche dei prodotti o dei componenti, dimensioni, schemi di montaggio, colori, ecc., hanno valore meramente indicativo, in ragione delle specifiche tecniche e della evoluzione tecnologica dei prodotti aziendali. Al fine di migliorare la qualità del prodotto, la ditta si riserva il diritto di modificare lo stesso senza alcun preavviso e anche dopo l'accettazione dell'ordine. L'azienda si riserva di apportare modifiche parziali o totali ai prodotti senza preavviso declinando ogni responsabilità su eventuali dati inesatti. Eventuali lievi variazioni di tonalità dei colori e delle finiture rientrano nelle normali caratteristiche dei materiali impiegati. Tutte le differenze sopraindicate non sono tali da modificare significativamente i prodotti stessi e non costituiscono motivo di reso o sostituzione della merce o di contestazione.

USE AND MAINTENANCE

DIRECTIONS

- Before use, directions and assembling instructions, which are inside the package, have to be kept and read carefully.
- The base has to be ballasted. An insufficient weight will seriously compromise the stability of the parasol.
- Always remove crank when not in use and keep out of reach of children.
- To avoid damage or personal injury, parasol must be closed and in some extreme weather conditions it may be necessary to remove the product and store it in a protected place. Remember always that the parasol is not a fixed construction. The company Scolaro cannot be held responsible for damages to goods supplied, or injury resulting from improper use and failure to follow instruction and guidelines given on.

PRODUCT EMPLOY

Before starting to open the parasol, make sure that the fabric has not got caught in the internal ribs. To open or close the parasol, turn the handle (where available) in the direction indicated by the arrows and the words "Open" or "Close". Incorrect operation could tear the string or damage the mechanism. Never force the ropes or handles. If they get stuck, check why this has happened and eliminate the possible cause. Wooden parts: apply a wax-based wood-stainer at least once a year before the winter season. Close the parasol when the weather conditions are unsuitable, strong wind or heavy rain. Scolaro parasols can be combined with special bases developed for the ground fixing. If it is decided to position a Scolaro parasol using ballast only, their suitability for use in conditions of moderate wind is certified. In the specific table the minimum ballast weights are indicated. The Customer is the sole party responsible for installing and managing the parasol.

STAINLESS STEEL

Attention:

1. DO NOT USE THE FOLLOWING PRODUCTS on any parts made of stainless steel: Chlorine bleach or detergents containing bleach (they can corrode stainless steel). Hydrochloric acid or products containing chlorides (they can corrode stainless steel).
2. Salt, limestone or acids (drinks and food) may discolour parts made of stainless steel if not cleaned promptly.
3. Products or parts made of stainless steel used near the seaside or for the interior decoration of swimming pools require more frequent cleaning in order to remove chlorites deposited on them and to prevent corrosion and chemical deterioration of the external surfaces.
4. Stains or rust noted on stainless steel surfaces must be cleaned promptly.
5. Stains left in place for long periods may become permanent.
6. Rust may cause chemical reactions or corrode stainless steel.

To remove stains or rust:

- Apply a specific non-abrasive detergent or polish for stainless steel.
- Rinse thoroughly with clean water.
- Lastly, dry thoroughly in order to prevent streaks from occurring, rubbing in the sense of the fibres.

VARNISHED METALS: IRON AND ALUMINIUM

For a long lasting of the parasol we recommend to store it in dry environments, during the winter and when not in use. It's also recommended to check once a season, especially after a long period of inactivity, the proper functioning of all components. Our warranty does not cover any type of scratches or abrasions to finish caused from the contact with other furniture or any resulting corrosion. The employ in marine environments can lead to the accumulation of salt and chlorides on the powder coating. Failure to perform regular cleaning with fresh water can cause blisters, oxidation, discoloration and invalidates the warranty. To clean surfaces in varnished metals, use cold water and non abrasive or aggressive liquid detergents. Apply with a soft cloth. In the case of very dirty and/or aged surfaces, after cleaning, it is advisable to treat them with liquid paraffin. In the event of stains caused by lime deposits on varnishes of coarse structure (eg. antique iron and indian brown) clean them with a cloth and a solution of white wine vinegar diluted in cold water.

WOOD: IROKO

Traditional wood employed for outdoor furniture and the marine industry. Iroko is a hardwood with a high oil content, suitable for external use. Extremely long-lasting. It is practically unalterable to repeated exposure to atmospheric factors. Even if treated, the surface takes a silver-grey coating which is the natural protection from inside the wood, considered an essential part of Iroko's charm. The natural tendency of wood to turn gray or lose the brightness of the paint can be prevented in the early stages of the product life. The parasol can be restored by a new treatment with proper products easy to find in specialized shops. It's necessary to apply a solution of water and colourless oil, to exposed surfaces with a cloth. The oil must be highly diluted. Superficial stains can be removed by intervening in time, before the wood can fully absorb them. Gently sand the surface in question and then polish with a rough cloth.

SYNTHETIC FABRICS: ACRYL AND POLYESTER

The fabric is waterproof and anti mould treated to reject water, spots and grant transpiration. Please follow our maintenance instruction to grant the long lasting of the fabric:

- Remove often dust deposits, spots and any type of dirt in order to avoid trails after cleaning.
- It's very important to close the parasol only when it is perfectly dry. During the winter and when the parasol is not employed, it has to be stored in dry environment. Avoid prolonged contact with oily substances and/or dyes that could be absorbed by the covering material in PVC and cause permanent stains, in addition to damaging the structure of the thread. Do not use solvents or solvent-based detergents (avoid acetone). Use water and non-abrasive, colourless liquid detergents with a neutral PH. Let the detergent act for a few minutes. Rinse well with water no warmer than 30°C.

COMPONENTS

The steel components, screws and accessories are anti rust treated. Anyway for a long lasting of the parasol, during the winter and when the it is not employed, the parasol has to be stored in dry environment. During every season it is necessary to check the functionality of all components, especially after a long period of non-employ. The company Scolaro is at your disposal for technical assistance.

WARRANTY

Scolaro parasols are designed to last for many years exposed to outdoor use.

As with many items, attention in use and maintenance and following the instructions contained in these pages, allows an even longer average life of the product and the possibility of enjoying an even more efficient and aesthetically pleasing product.

Scolaro's products are guaranteed for 2 years. If you comply with the indications and advices, the warranty can be extended as follows:

THE WARRANTY COVERS ONLY MANUFACTURING DEFECTS OF STRUCTURAL INTEGRITY. THE WARRANTY DOES NOT COVER DAMAGES CAUSED BY MECHANICAL ACTIONS, FORCE OF NATURE AND MALICIOUS ACTS.

5 years warranty on aluminum and stainless steel components. Including painting and screws.

- Structural faults not resulting from improper use or lack maintenance.
- Invasive corrosion not produced by scratches or abrasions from use not removable through normal cleaning and maintenance.

5 year warranty on colors and treatment of fabrics (strength).

- The replacement of the canopy during the warranty period is foreseen only if it loses its color before the end of the warranty period. Users must properly maintain fabrics for the warranty to be effective. Proper maintenance implies regular cleaning.
- The warranty does not cover damage from contact with foreign objects, wind-driven abrasions, misuse or abuse (tears, burns and holes). The intensive employ in an aggressive environment (seaside and pool use), requires a regular rinse of the fabric with fresh water in order to prevent and avoid the build-up of salt and chloride residues.

2 years warranty on all metal and steel elements in general

1 year warranty on the opening mechanisms with crank subject to correct and respectful use according to the instruction given.

2 years warranty in general for finishes and other materials not specifically mentioned and written above, including concrete bases and ballasts.

1 year warranty on LED light kits and electrical components in general. THE WARRANTY DOES NOT APPLY:

- If the product has not been assembled according to the instructions provided;
- in the event of improper use of the product or use that does not conform to normal intended use of the property;
- in case of non-compliance with the instructions for use and maintenance indicated in the information material supplied with the product;
- in case of storage in environmental conditions that are not suitable for the product;
- in case of modification or tampering with the product;
- if the product has been assembled or combined with components and products not provided by Scolaro.

To take advantage of the warranty the faulty item must be shown or pictures must be forwarded, together with the invoice or receipt.

The warranty includes the supply of spare parts or the replacement of the product if necessary.

The warranty does not include the repair on-site or the refund of costs incurred for non-use of the product. In case of defect confirmed by Scolaro, it reserves the right - at its own discretion - to replace the product with an equal or equivalent one for essential characteristics or to refund only the amount paid for the product to the customer.

No further expenses or damages can be requested from Scolaro. Scolaro will not be liable for any damage to properties or individuals deriving from an improper use of the product.

Service and repairs policy

Even in the event of damage and breakage, Scolaro has always adopted a careful and punctual after-sales assistance policy.

In any case of damage or need, we recommend contacting our company to evaluate the possibility of repairing and recovering the product, as well as to get assistance in carrying out the intervention.

The connection between the high qualitative and functional standards of the materials used, constitutes the main guarantee of the sturdiness and the resistance of the company's products over time. Respecting the rules of maintenance and use, specified as follows, will ensure the success of these objects, which were devised with Scolaro quality, to last a long time.

The information contained in this brochures or other Scolaro's advertisements prints, such as product specifications or components, dimensions, assembling instruction, colours, etc., are purely indicative, because of the technical specifications and the technological evolution of the company's products. In order to improve the quality of the product, the company reserves the right to change the same without prior notice and even after acceptance of the order. The company reserves the right to make partial or complete changes to the products without prior notice and declines any responsibility for inaccurate data. Any colour differences and changes of finishing have to be considered normal characteristics of the materials used. These differences do not significantly change the products and aren't reason for return or replacement of the goods or dispute.
